Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) is objected to because the IDS submitted on 06/20/05 have not been filed with the application. Accordingly, the examiner is not considering the information disclosure statement.

Oath/Declaration

3. The Oath and Declaration filed on 06/20/2005 is acceptable.

Drawings

4. The drawings filed on 06/20/2005. These drawings are acceptable.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 1 is rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicant presently claims (implicitly) *illuminating with coherent light a volume-wise at least partially scattering surface of reference objects under specified illumination conditions, recording the speckle patterns thus obtained for various nominal values of illumination parameters ...* The disclosure, however, is not seen as adequately teaching volume-wise, specified illumination conditions and nominal values.

Due to problems under 35 USC 112, first paragraph above, claims 1-18 are not searchable. The search will be conducted when the problems are clarified.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claims 19 and 20 are rejected under 35 U.S.C. 102(e) as being taught by Markantes et al (U.S. Patent No. 6,970,236). Hereafter, "Markantes".

As to claim 1, Markantes teaches an optical recording device with laser source (column 7, lines 37-39), a storage device (column 9, lines 25-33) and an optical reading device with laser source, whose illumination beam illuminates the objects and whose optical device forms on the detector of the reading device an image of the illuminated area of these objects (column 7, lines 60-67) and (column 8, lines 1-4), parameters of these optical devices being modifiable (column 13, lines 13-48) and (column 14, lines 36-52).

As to claim 20, Markantes teaches the modifiable parameters are one at least one of the following parameters: wavelength of the laser source, direction of emission of the laser beam, focusing of the laser beam, position of the laser source, inclination and position of the object with respect to the laser beam (column 13, lines 13-48) and (column 14, lines 36-52).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The reference Markantes et al (U.S. Patent No. 6,970,236) teach of various features similar to the claimed invention.
